this is a true story about how the system of justice works to protect america s children with the essential support of thousands of volunteers guardian ad litem gals also known as court appointed special advocates we call them guardians without wings we have found the lack of proper education the influence of secularism and especially poor moral upbringing represent the fundamental causes of child abandonment neglect and abuse more than 75 of americans claim to be judeo christians at the beginning of this century our constitution and bill of rights are based on christian principles yet many have discarded these values that are the foundation of our society we believe that all children are born innocent and lovable it is the parents

relatives role models peer group pressure secular and atheistic teachers and mainly the culture of death that have caused too many of these children to grow up to become dysfunctional adults and in many cases appalling parents what do we mean by culture of death in western society it is our growing divorce rates over 52 abortion on demand 50 million so far and rise of euthanasia unmarried parents who lack responsibility for their children and the epidemic of illegal drug addiction problem some parents are clueless about the essentials of parenting they are immature adults themselves as one judge said they are like rabbits that keep on reproducing should these adults have children if they are morally and psychologically unable to be loving caring parents you can't love if you have not been loved as a child the lack of spiritual formation jewish christian among other faiths was predominant in about 80 85 of our cases and that represents one of the most important reasons for the breakdown of social order in our society conversely we must be very careful to avoid extreme fundamentalists that will actually create further issues for our children if we have full employment and great economic growth but our children have not learned to walk in goodness justice and mercy then the american experiment will have failed william bennett

a silent epidemic in the u s is imperiling our health over medication today one third of all adults take two or more prescription drugs and half of all seniors take more than five daily this book the first of its kind shows readers how to avoid the dangers of over medication the first half of the book describes the harmful effects of taking too many drugs including drug drug interactions medication errors unintentional overdoses unnecessary medications made up illnesses restless leg syndrome and side effects that actually mimic a new illness the second half discusses the benefits and harm caused by many of the most popular drugs used to treat diseases such as high blood pressure diabetes high cholesterol acid reflux depression and pain it tells which drugs are really needed and whether or not they cause side effects finally readers will learn how to discuss their concerns about too many medications with their health care providers simple ways to make positive lifestyle changes and when to consider alternative healing approaches combining stories of those who have suffered ill effects from taking too many drugs with data from cutting edge medical findings do you really need to take that pill helps readers realize they can choose different solutions to their health problems

twelve step programs are the foundation of conventional thinking and treatment for people with addictive behaviors but are they truly the best here tony bevacqua explains why these one size fits all approaches are not appropriate for everyone since each person is a unique human being this book takes a humanistic perspective that offers guidance for sufferers their families and friends practitioners and anyone interested in understanding the nature of addictive behaviors what do we know about addictive behavior and mental health bevacqua maintains our common perceptions are loaded with outdated emotionally charged and deficit based vocabulary words like addiction addict alcoholic denial recovery clean and others have become absorbed into our vocabulary but conjure up the worst case descriptions of undesirable behavior these labels are generalized to all behaviors and to all people regardless of the details of their specific circumstances by rethinking and changing the language new learning can take place and new approaches to treatment can emerge while biology may play a role in addiction the author argues that the disease model strips sufferers of their

ability to see their issues as within their control to address understanding the role of learning and behavior allows people to redefine addiction in terms of their own personal circumstances allowing that the brain is an organ of social adaptation and is constantly able to wire and rewire itself through enriched environments and new learning bevacqua proposes a language that also supports an individual with kindness compassion and empathy and suggests ways in which this new perspective and approach can help individuals improve the quality of their thinking which will improve the quality of their behavior
